JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Fumigation no longer necessary.

NOVEMBER 10, 1905.

FRICK, *American Consulate, Tampico:*

Fumigation no longer necessary for southern ports. Inform Merrick.

GLENNAN,
*Acting Surgeon-General.**Report from Veracruz—Inspection and fumigation of vessels—Yellow fever.*

Passed Assistant Surgeon Wilson reports, November 6, as follows:

Week ended November 4, 1905.

Vessels inspected and bills of health issued.....	6
Vessels fumigated with sulphur to kill mosquitoes.....	1
Vessels departing on which mosquitoes (<i>Culex</i>) found.....	4
Vessels departing on which mosquitoes (<i>Stegomyia</i>) found and killed.....	1
Crew inspected.....	274
Passengers inspected.....	116

The American schooner *Starke* arrived October 27, eight days from Pascagoula. One of crew was taken sick with headache and fever two days before reaching here. The case proved to be one of yellow fever, was isolated on shore, and all accessible parts of the vessel were fumigated by the Mexican authorities. A thorough search made of the vessel some time after fumigation failed to disclose any *Stegomyia*. No other cases of fever have developed up to the present time, November 6. The vessel will be fumigated throughout before departure.

November 2, while inspecting the Spanish steamship *Martin Saenz* (ten days at wharf, Habana; three days bay, Veracruz), bound for New Orleans, a few *Stegomyia fasciata* (adults) were found in the chief engineer's room. Some *Stegomyia* larvæ and pupæ were also found in the same room, being in the water tank for the wash basin. This tank had not been used for some time. The larvæ and pupæ were killed with hot water, and the room sulphured.

Only 3 cases and 1 death of yellow fever were reported for the week.

NICARAGUA.

Reports from Bluefields, fruit port—Representative of Louisiana board of health recalled.

Acting Assistant Surgeon Layton reports as follows: Week ended October 28, 1905. Present officially estimated population, 3,500; prevailing diseases, malarial fever and dysentery; number of deaths not reported; general sanitary condition of this port and the surrounding country during the week, good. The Louisiana State board of health recalled its representative to-day—he sails on November 1, 1905.

Bill of health was issued to the following-named vessel:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Oct. 25	Dictator.....	Mobile	19	2
